

Hey there,  
I'm Ikenna, a software developer, tech creator and medical doctor.  
I share tools, templates, and smart career tips so you can show up confidently and save time.

I was recently doing a routine resume do-over and came across these clean resume templates on Canva and I thought to share.

Follow the instructions at the end of the list in order to use and share the resumes properly.

### How to use:

1. Open the template by tapping on the link. This will open the template in Canva.
2. Customize it as needed. You can change fonts, colors, typography to match your brand or identity.
3. **Download the right way.** Click on Share -> Download -> PDF Standard.

It is very important to not download or share resumes as images as ATS (Applicant Tracking Systems) cannot read images. PDF keeps your text searchable and scannable.

### Bonus Tips

- Keep it to 1 page if you have <10 years experience
- Use bullet points, not long paragraphs
- Start bullet points with strong action verbs
- Add measurable results: “Improved response time by 30%” hits harder!
